

ASBESTOS AWARENESS TRAINING

The Control of Asbestos regulations 2006 require mandatory training for anyone liable to be exposed to asbestos fibres at work (see regulation 10). This includes maintenance workers and others who may come into contact with or who may disturb asbestos (eg cable installers) as well as those involved in asbestos removal work.

(HSE website: Control of Asbestos Regulations 2006/guidance/training)

A B C Provide United Kingdom Asbestos Training Association (UKATA) accredited Asbestos Awareness Training

Our courses are designed to exceed the Health and Safety Executive requirements & concentrate on how to truly protect your workforce. Courses are held at either your own venue or at our own dedicated training centre. Up to 15 delegates are permitted on each course, with content tailored towards your particular area of work.

Training takes 3 ½ hours and includes practical aspects and an easy to follow compliancy guide.

Upon completion of the course, a certificate will be issued to the delegate, in line with HSE guidance.

We work closely with many blue-chip companies & government agencies and have extensive local authority experience putting us in a unique position to provide quality training whatever it is you do! We work for every conceivable type of client and pride ourselves on being able to give you the best advice appropriate to your needs.

Asbestos Business Contractors Ltd

ASBESTOS AWARENESS TRAINING

Our Asbestos Awareness Training covers the following topics:

- The properties of asbestos and its effects on health, including its interaction with smoking
- The types of products or materials likely to contain asbestos, (extensive library of pictures)
- Two short videos appropriate to managers and work undertaken by your workers
- The operations which could result in asbestos exposure and the importance of preventive controls to minimise exposure
- Managers Responsibilities (how to protect workers and avoid a prosecution)
- Role of Asbestos Surveys and how to understand what is in them (with practical demonstration)
- Safe work practices, control measures, and protective equipment, (what you can do, what you can't do)
- The purpose, choice, limitations, proper use and maintenance of respiratory protective equipment
